A bit about Fisher... we're a 4th generation California Company. Since 1936 we've specialized in commercial plumbing fixtures for the foodservice industry. We believe our water and environment should be safer sooner than later... and we're ready to assist with a full line of stainless steel, lead-free faucets and fixtures that comply with the new law and are available NOW.

changes will help eliminate lead from your water and California's environment.

develop fixtures that comply with the new law. These choices that manufacturers will need to make to healthcare facilities and more. You'll understand the commercial kitchens in schools, restaurants, universities, will explain the issues of AB1953 and how it will affect

Please give us 8 minutes of your time... this DVD

Here's what you should do...

Light pink areas indicate optional aqueous address panel (no UV).

LEAD, however, should not be one of them.

HERE'S WHAT YOU SHOULD KNOW...

- ✘ Lead is one of the most dangerous, naturally occurring toxins.
- ✘ Lead has been found in paint, toys, lunch boxes, flooring, drinking water and other places you'd never expect.
- ✘ Lead is especially dangerous to children. It has been associated with illness, slowed mental capacity, even crime.
- ✘ Lead shouldn't be in your drinking water or the environment... and a new California law is looking to help eliminate it.

Recently, Governor Arnold Schwarzenegger signed into law Assembly Bill 1953. The intent is to reduce the amount of lead in specific plumbing fixtures from its current regulated amount of no more than 8%, to a new standard not to exceed 0.25%.
